

### **Important instructions to speakers:**

1. All speakers are encouraged to attend both morning and afternoon sessions and stay for all presentations.
2. A projector will be set up for the presentations. Please arrive at least **15 minutes prior to** the session in which you will present and check if your computer works with the projector.
3. Please refer to the schedule for the time of your presentation.
4. Each speaker has **20 minutes** for presentation and **5 minutes** for questions. The total time for each speaker is 25 minutes. A warning signal will be given by the presider at the 15-minute mark.
5. Please keep in mind that judges might not be experts in your specific fields. Your presentation should be accessible to audiences with a general physics background.
6. Your presentation will be evaluated by the judges in the following aspects:

#### **Physics related:**

1. The physics motivation (or background) of the research
2. The specific objectives of your project
3. Soundness of theory and/or experimental approach
4. Theoretical and/or experimental results and discussions
5. Conclusions and outlooks

#### **Presentation related:**

1. Legibility, clarity and organization of text, figures, graphs, and tables
2. Loudness and clarity
3. Management of presentation speed, pauses and time
4. Summary, references, acknowledgement
5. Handling of questions
